MEMORANDUM FOR: Executive Secretary, Suggestion and Achievement
Awards Committee

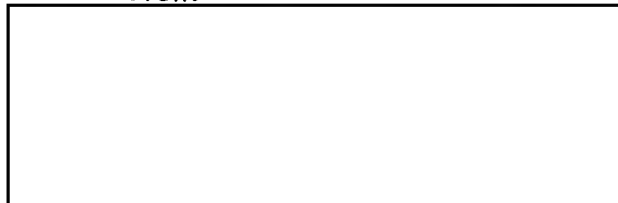

FROM :

SUBJECT : Reference Suggestion 77-489

Dear

1. This memorandum is intended to follow-up on my suggestion - 77-489 and to ask you to clarify one of the statements made in the suggestion evaluation report. Specifically paragraph 2 of the Logistics review of my suggestion said in part "Should space requirements arise in the future for which this suggestion appears to be an option, we will ensure that due consideration is given..."

2. It is my understanding that there is now an urgent need for additional office space in Headquarters Building to satisfy new and pressing requirements created as a result of the Intelligence Community reorganization. If this understanding is correct, I believe my suggestion should move out of the "Should space requirements arise in the future..." category to a status of active consideration.
